

Name of Announcement	Agency	High Priority	Current Status/Next Steps	Final Action/Expected Date	Mandatory or Discretionary	Brief description of announcement (including who may like or dislike it)	Completion Date	Is this action Controversial? Yes/No	Include on the Policy Calendar? Yes/No
Clear Creek Reevaluation Study Project	EPA R6	No	Completed 2/14/12	2/14/2012	Mandatory with extension only by request/approval	Draft Supplement EIS for Flood Risk Management and Ecosystem Restoration in Brazoria, Fort Bend, Galveston, and Harris Counties, TX. There are no controversial issues related to this project at this time.			
Habitat Conservation plan for Oncor Electric Delivery Services	EPA R6	No	Completed 2/16/12	2/21/2012	Mandatory with extension only by request/approval	FEIS documents the environmental condition pertaining to the application for incidental take on eleven federally listed species in 100 Texas counties. No controversial issues are expected.			
Gulf of Mexico OCS Oil and Gas Lease Sales	EPA/R6/6 EN lead reviewer EPA/R4 associate reviewer	No	Completed 2/16/12	2/21/2012	Mandatory with extension only by request/approval	This action does not contain policies regarding changes in procedure and permitting in response to deepwater Horizon. Final supplement EIS for the 2012 Gulf of Mexico Outer The FSEIS has been prepared by the Bureau of Ocean Energy Mangement (BOEM) to address the potential changes to the baseline conditions of the environmental and socioeconomic resources that took place as a result of the Deepwater Horizon (DWH) event that extended from April 20th to September 19th, 2010. This is not an EIS on the DWH event, although information on this event is analyzed as it applies to the resources in the Central Planning Area (CPA). Proposed CPA Lease Sale 216/222 is the Federal action addressed in the FSEIS and is the remaining area wide oil and gas lease sale within the CPA.			
Taos Ski Valley 2010 Master Development Plan, Phase 1 Project	EPA R6	No	Completed	2/27/2012	Mandatory with extension only by request/approval	Draft EIS analyses phase 1 projects which includes two new lifts, three lift upgrades to reduce lift ride times and lift line waittimes, two new gladed areas, winter and summer recreation activites, and reconfigure the parking lots. There are no controversial issues related to this project at this time.			
Flourine Extraction Process and Depleted Uranium Deconversion Plant	EPA R6	No	Completed	2/27/2012	Mandatory with extension only by request/approval	Draft Enivornmental Impact Statement on a proposed facility in Lea County, NM, that would deconvert depleted uranium hexaflouride from the uranium enrichment industry to make it more suitable for disposal. No controversial issues at this time.			
HB In-Situ Solution Mining Project	EPA R6	No	Completed	3/5/2012	Mandatory with extension only by request/approval	Final Environmental Impact Statement proposes to extract the potash remaining in inactive underground mine. A NPDES permit is required. The mine is located in Eddy County, NM. There are no controversial issues related to this project at this time.			
I12 to Bush, Louisiana Proposed Highway	EPA R6	No	Completed	4/9/2012	Mandatory with extension only by request/approval	Final Environmental Impact Statement proposes to construct a high-speed, four-lane arterial highway from the southern terminus of LA-21 to I-12 , St. Tammany Parish, LA. The DEIS received a rating of EC-2. The primary concerns relate to wetlands, cumulative impacts and mitigation.			

Louisiana Coastal Area Barataria Basin Barrier Shoreline Restoration, Lafourche and Jefferson Parishes and Shell Islands in Plaquemines Parish, LA	EPA R6	No	Completed	4/30/2012	Mandatory with extension only by request/approval	Final EIS for the Louisiana Coastal Area Barataria basin barrier shoreline restoration project. The project will restore the barrier shoreline ecosystem and significantly reduce the loss of estuarine and freshwater wetlands in Caminada Headland in Lafourche and Jefferson Parishes and Shell Islands in Plaquemines Parish, LA. There are no controversial issues related to this project at this time.			
Santa Fe National Forest Travel Management plan	EPA R6	No	N/A	8/6/2012	Mandatory with extension only by request/approval	Final EIS for the Santa Fe National Forest Travel Management plan. The project proposes to Provide for a System of Road, Trails, and Areas Designated for Motorized Use, Sante Fe, NM. The DEIS was rated LO.	N/A	NO	NO
Valles Caldera National Reserve	EPA R6	No	In process	8/14/2012	Mandatory with extension only by request/approval	The Draft EIS proposes a public use and access plan. Project is located in Sandoval and Arriba Counties in New Mexico. There are no controversial issues related to this project at this time.	8/14/2012	NO	NO
South Padre Island Second Access Project	EPA R6	No	In process	8/15/2012	Mandatory with extension only by request/approval	The Draft EIS proposes to extend State Highway 100, across the Laguna Madre, to Park Road 100 on the island. Connection points to State Highway 100 and Park Road 100 have not yet been determined and would be contingent upon the alternative selected for the proposed facility. Preliminary concerns relate to wetlands, endangered species, and mitigation plans.	8/14/2012	NO	Yes
SunZia Southwest Transmission Project	EPA R6	Yes	Completed	8/22//2012	Mandatory with extension only by request/approval	The Draft EIS studies the SunZia Southwest Transmission Project which involves the construction and operation of two new 500 kV transmission lines from Lincoln County in New Mexico and terminating at the Pinal Central Substation in Pinal County Arizona. The route will be approximately 460 miles in length. The SunZia project would enable the development of renewable energy resources including wind, solar, and geothermal generation. This project was announce as part of the Obama Administration's renewable energy and transmission line project initiative to address grid modernization. Concerns relate to endangered species, fowl migration, and impacts to parks.	7/24/2012	NO	Yes
US 69/Loop 49 North Lindale Reliever Route Project	FHWA	NO	In process	1/20/2014	Mandatory with extension only by request/approval	The DEIS prepared TxDOT proposes to construct a new location, full control of access reliever route around the city of Lindale in Smith County, Texas, referred to as U.S. Highway (US) 69/Loop 49 North Lindale Reliever Route (Lindale Reliever Route). The proposed action is intended to provide relief to the existing US 69 through the city of Lindale and extend a proposed toll facility (Loop 49 West) from IH 20 southwest of Lindale to US 69 north of Lindale. There are no known significant issues.	1/14/2014		
Southwest Coastal Louisiana Project	USACE	NO	In process	1/27/2014	Mandatory with extension only by request/approval	The DEIS prepared by the USACE will provide nonstructural hurricane and storm surge damage risk reduction measures as well as ecosystem restoration features in the 4,700 square mile study area located in Calcasieu, Cameron, and Vermilion Parishes in southwest Louisiana. There are no known significant issues.	1/27/2014
